

Calculating Box Liner or Pallet Cover Sizes

INNER BOX LINER

1. For the bag width, add 1" to the length.
2. For the gusset, use the width.
3. For the length, add box width plus the box height plus 6" for a tie off.

EXAMPLE

Width $74" + 1" = 75"$

Gusset $42" = 42"$

Length $42" + 47" + 6" = 95"$

Bag Size Required = $75" \times 42" \times 95"$

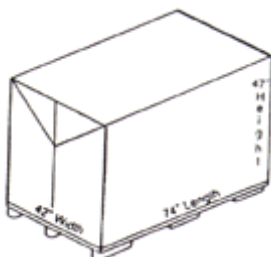

Alternate Method: Box (12") Width x (11") Length x (7") Depth

For Bag Width: Add 1" to width = 13"

For Bag Length: Add 1" to length = 12"

For Bag Depth: Add $\frac{1}{2}$ width + depth of box + $\frac{1}{2}$ length + 3" for tie
Resulting Bag Size: $13" \times 12" \times 21"$

PALLET COVER

1. For the bag width, add 2" to the pallet length.
2. For the gusset dimension add 2" to the pallet width.
3. For the bag length, add one half of the pallet width plus the pallet height plus 5".

EXAMPLE

Width $74" + 2" = 76"$

Gusset $42" + 2" = 44"$

Length $21" + 47" + 5" = 73"$

Bag Size Required = $76" \times 44" \times 73"$
