

## Calculating Box Liner or Pallet Cover Sizes

### INNER BOX LINER

1. For the bag length, add 1" to the box length.
2. For the bag gusset, add 1" to the box width.
3. For the bag depth add  $\frac{1}{2}$  length plus  $\frac{1}{2}$  width plus height plus 4" for a tie off.

Box Size 74" (L) x 42" (W) x 42" (H)

#### EXAMPLE

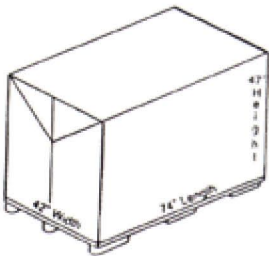

Length 74" + 1" = 75"

Width 42" + 1" = 43"

Height 37" + 21" + 42" + 4" = 104"

Bag Size Required = 75" x 43" x 104"

### PALLET COVER

1. For the bag width, add 2" to the pallet length.
2. For the gusset dimension add 2" to the pallet width.
3. For the bag length, add one half of the pallet width plus the pallet height plus 5".

#### EXAMPLE

Width 74" + 2" = 76"

Gusset 42" + 2" = 44"

Length 21" + 47" + 5" = 73"

Bag Size Required = 76" x 44" x 73"
